

TENARO

TENARO GLOBAL EPC PRIVATE LIMITED

**Globally Multi-Sector
Engineering Procurement
& Construction Company**

Company Overview

Tenaro Global EPC Private Limited is a multi-sector Engineering Procurement and Construction company focused on project execution, global sourcing and trade-driven solutions across international markets.

The company is established with a clear intent to build a lean and execution-focused EPC platform that combines engineering understanding with commercial intelligence.

Our approach is grounded in practical execution, flexible engagement models and a strong focus on delivering measurable value across projects.

Our Vision

To build a globally integrated EPC and trade platform that connects engineering capability with market opportunity across regions.

Our Mission

- Deliver projects with speed, precision and accountability
- Combine engineering understanding with commercial awareness
- Build long-term partnerships based on trust and performance
- Leverage global sourcing for cost-efficient project execution
- Continuously strengthen execution capability through learning and adaptation

Our Core Capabilities

EPC Project Execution

End-to-end delivery covering engineering, procurement, construction and commissioning.

Engineering Support

Technical planning, system coordination and execution-oriented design support.

Procurement and Global Sourcing

Strategic sourcing of equipment and materials through established supplier networks.

Construction and Execution Management

On-ground coordination, installation supervision and structured execution.

Trade and Commercial Solutions

Cross-border trade execution driven by pricing intelligence and supply chain efficiency.

Key Sectors

Energy (Renewable and Thermal)

- Solar PV systems, inverters and BOS components
- Wind energy systems and support infrastructure
- Boilers, pressure parts and balance of plant equipment

Oil and Gas

- Static equipment: tanks, vessels, heat exchangers
- Piping systems: pipes, fittings, flanges, valves
- Structural fabrication and skid-based systems

Process Industries

- Process equipment and industrial machinery
- Heat transfer and fluid handling systems
- Utility systems and fabricated components

Execution Models

● Turnkey EPC

Complete responsibility from engineering to commissioning.

● Package / Scope-Based Execution

Execution of defined project components within larger projects.

● Trading and Supply Solutions

Global sourcing and cross-border supply of equipment and materials.

Our Approach

At Tenaro, execution is aligned with commercial outcomes.

We focus on:

- Clear scope definition
- Cost and schedule discipline
- Supply chain optimization
- Risk visibility and coordination
- Outcome-driven project

Our Partners & Ecosystem

Tenaro operates with access to a strong industrial ecosystem supported by manufacturing partners, engineering collaborators and global supplier networks.

The company benefits from exposure to established industry environments, including organizations such as Dehu Engineering India Private Limited, enabling alignment with practical manufacturing capabilities and reliable execution standards.

Why Tenaro ?

- Execution-focused approach
- Lean and agile structure
- Commercially driven decision-making
- Access to strong supplier and manufacturing ecosystem
- Global market orientation

Closing Statement

Tenaro Global EPC is committed to building a strong execution track record by delivering projects with clarity, discipline and reliability.

We aim to grow through performance, partnerships and continuous improvement across global markets.
